Latest Markets and Curb Gossip

By Sun Leased Wire.

New York, Aug. 18.-In the early trading today the rally, which began in the last hour yesterday, continued, but it was not of long duration, and in the afterneon stocks sold off very sharply to ower prices than before the rally,

Speculation in Union Pacific was again nost active, and Union Pacific was by far the weakest stock on the list, closing five points below the high price of the day. Practically all of the discussion re-lating to it had regard to Mr. Harriman's health. In addition to the many published reports, conflicting private re-ports were received and many speculators placed an unfavorable construction upon a cable from Mr. Harriman to one of his business asscelates in which he said that he had lost ten pounds and was coming home for a rest and after-cure. It was after this cable was given out that the selling movement attained the greatest momentum and there was no loobt Mr. Harriman's health was considered a matter of prime market im-portance. It was natural enough that it should be so considered in respect to certain shares, for the advances in Union Pacific, New York Central, and to some extent in other stocks, have been based on the expectation of the execution of plans beneficial to stockholders in these companies, and these plans may be de-ferred or abandoned in case Mr. Harriman's health does not permit attention to business upon his return.

The best obtainable information is to the effect that Mr. Harriman has benefited greatly from the trip abroad, though naturally weakened by the dras-tic treatment in the baths. A contrary view gained currency among speculators today, however, and the declines were almost in all those stocks with which his name is so closely connected. Argu-ments adverse to the market were also gathered from the reports of damage to spring wheat in the northwest and to corn in Kansas and the resulting ad-vance in all the wheat and corn options. The reaction was also accelerated, no doubt, by the existence of remaining and vulnerable speculative accounts of the same general nature as those which were successfully attacked in the previous days of the week.

Business, trade and railroad reports were favorable. The Baltimore and Ohio, the first important road to report for July, showed an increase of \$80,000 in gross earnings over the earnings of July, 1908, and an increase of \$764,000 in visiting expenses, supplying thus another indi-id Mrs. cation that as the radroads are now making money they are spending it more plentifully for labor and materials and contributing in greater degree to the general prosperity.

The activity of the steel business was

strikingly demonstrated by certificates of ore shipments on the great lakes. showing as heavy a movement of ore as at any previous time and by the weekly reports in the trade papers. These reports reflected the increased earnings of the railroads and the disposition among daughter Rosalind spent Saturday in railroad managers to place orders for Canton at Meyers lake.

still greater increase in business. The car equipment companies, according to one of the trade reviews, will hardly be able to fill orders rapidly enough to prevent a car shortage before the close of the current year, and both of the standard trade papers refer to the fact that the United States Steel corporation has opened books for rail orders for next year's delivery, and that one subsidiary alone has taken contracts for 200,000 tons. The company is now operating 92 per cent, of its furnace capacity which is as great a proportion as is pos-sible until repairs are made to various

It was announced that arrangements had been made to ship \$3,000,000 in gold to Japan in September, and \$1,250,000 to the Argentine in the next few weeks. Money matters were unchanged, though the continuing healthy demand for commercial paper indicated a tendency to-
